

nonnina

Cursor × Sandbox Hackathon · Stuttgart · 7 Nov 2026

One button for Nonna.
Every job around her, done.

A voice companion for older people who live alone, and the marketplace of verified local helpers their family can trust.

nonnina.eu

EN DE IT

The care gap isn't medical. It's everything around it.

WHAT CARE SERVICES MAY DO AND BILL

Grundpflege

Behandlungspflege

Basic and medical care by trained nurses, paid by the Pflegekasse.

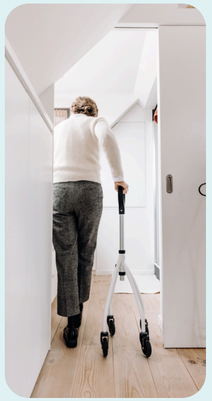

THE GAP

Nobody's job. Nobody's budget.

Asked for on every round, refused or done for free.

WHAT OLDER PEOPLE ASK FOR, EVERY DAY

- Shopping
- Laundry
- Cleaning
- Trips to the doctor
- Walks
- Company
- Cultural outings
- Explaining a letter
- The TV that won't work
- Help with the phone
- Taking out the rubbish
- Callbacks

THE OLDER PERSON

Maria, 82, alone

Asks her carer for help, hears "not my job", and there is nobody else to ask.

„Ich brauche Hilfe beim Einkaufen."

THE FAMILY · OUR CUSTOMER

Julia, 48, two hours away

Wants to help her mother and can't from afar. Calls, WhatsApp, guesswork, guilt.

No overview of who could do it, or what it costs.

THE CARE SERVICE

Flooded with requests

Gets asked every day for things it may not do or bill, and has to say no.

„Die Pflegekraft ist Mädchen für alles."

Our customer: the adult child, 40 to 60, living away from a parent 70+ who lives alone.

02 SOLUTION

A need goes in. A done job comes out.

THE FAMILY DECIDES

THE MARKETPLACE

01

Maria asks

One button, in her own voice. No app to learn.

02

AI tries first

A recipe, a call, an order. Solved in seconds.

Solved: no job, no fee

03

Family approves

Julia sees the request on her phone and says yes.

04

Family posts it

She chooses to put the job on the marketplace.

05

Helpers pitch

Only helpers ID-verified and screened by Nonnina.

06

Family picks one

She approves a pitch. The helper does the job.

Emergency or worry, at any step: Nonnina alerts the family within seconds and puts 112 one tap away on Maria's screen.

NOT AN EMERGENCY SERVICE

Maria never sees a marketplace.

She just asks. The family stays in control of every job, every helper and every euro.

everyday jobs every one of them named

THE BIG FINDING

From January 2027, care services may no longer use the €131 Entlastungsbetrag for this help.

„…muss man dann ablehnen." — IMPULS, Bad Cannstatt

Until now
Shopping, walks, doctor trips billed as standard via the Entlastungsbetrag.

Jan 2027
Care services have to refuse it. Families must find someone else.

Right now
Providers spin off separate Betreuungsdienste to keep serving it.

PFLEGEZENTRUM PAULINENPARK · ASSISTED LIVING

Residents want laundry, a cleaner, cultural outings. None of it is care, so they go elsewhere for it.

PFLEGEDIENST STUTTGART-WEST · BOTNANG

Callback requests and small errands arrive every day, and land on nurses who are there for care.

IMPULS · BAD CANNSTATT

New providers approach their nurses directly. Families don't know them, and older clients don't let strangers in.

So we built the marketplace. THE MARKETPLACE →

Reached: Paulinenpark, Pflegedienst Stuttgart-West, IMPULS Bad Cannstatt, and one more

The Upwork for elderly care.

One place where families compare, book and pay for every kind of help.

How the market works with us

SUPPLY · FRAGMENTED

- New Betreuungsdienste
- Spin-offs of care services
- Independent local helpers

Unverified, unlisted, impossible to compare.

→

WE UNIFY IT

onnina marketplace

- Every helper ID-verified and screened by us
- Comparable: what they do, price, availability
- Requested by voice, booked and paid in one place

→

DEMAND · FAMILIES

Julia picks the right provider for her mother.

From two hours away, in minutes, with a budget that already exists.

The opportunity

5.52m
people cared for at home in Germany

9.8m
aged 80+ by 2050, up from 6m

690,000
carers missing by 2049

BUSINESS MODEL

10–15%

of order value on every completed job, with a monthly family subscription that drops the fee.

GO-TO-MARKET

First customers: adult children, 40 to 60, in Stuttgart.

Reached through Pflegestützpunkte, caregiver communities and the care services we interviewed.

Stuttgart — Germany — Italy — Rest of Europe

Non-medical help needs no SGB XI approval, so we can operate immediately.

Why us, and why now.

Ruben Havrestiuc

- CTO · Tech lead

Arjit Yadav

- Backend & Voice AI

Megha Darda

- QA & Reliability

Gloria Niiquaye

- Market & sales validation

David Göz

- Marketing & go-to-market

Next 90 days

Prove it in one postcode

- Twenty verified helpers in one Stuttgart postcode
- Fifty households live, with the family paying
- Willingness to pay proven end to end, not surveyed

Why now

1 The market is being reshuffled

In January 2027 a whole category of help leaves care services. It needs a new home, and nobody owns it yet.

2 AI finally hears the need

Maria just says what she needs. Voice AI turns it into a job, with nothing for her to learn.

WHAT WE NEED

€500k pre-seed

Twelve months of runway for the five of us, the helper vetting process and one dense city. Plus introductions to Pflegestützpunkte and home-care services.
